

Software Requirements Specification (SRS)

MentoLink Mobile Application

Prepared by: Thenuri De Silva

Date: May 20

1. Introduction

1.1 Purpose

The purpose of this Software Requirements Specification (SRS) document is to define the functional and non-functional requirements for the MentoLink mobile application. The application aims to provide a platform that connects school students with university student mentors and tutors for academic support, tutoring services, and learning guidance.

1.2 Scope

MentoLink is a mobile tutoring marketplace designed to:

- Connect school students with university student tutors
- Allow tutor searching and matching
- Support session booking and scheduling
- Enable communication between students and tutors
- Provide secure payment processing
- Build trust through verified tutor profiles and ratings

The system will address problems identified in user surveys including:

- Difficulty finding reliable tutors
- High tutoring costs
- Inconsistent tutor quality
- Poor communication
- Lack of flexible scheduling

1.3 Intended Audience

This document is intended for:

- Project owner
- Business analysts
- Developers
- System testers

- UI/UX designers
- End users
- Stakeholders

1.4 Definitions and Acronyms

Term	Definition
Tutor	University student providing educational guidance
Learner	School student seeking educational support
Booking	Scheduling a tutoring session
Rating System	Mechanism for evaluating tutors
Verification	Validation of tutor profile information

2. Overall Description

2.1 Product Perspective

MentoLink is a standalone mobile application that connects tutors and students through an integrated platform.

External integrations:

- Payment gateway
- Notification service
- Database server
- Authentication service

2.2 Product Functions

The application shall provide:

- User registration/login
- Tutor profile creation
- Tutor searching/filtering
- Session booking
- Messaging
- Payment processing
- Notifications
- Ratings and reviews
- Learning resources

2.3 User Classes

Student

Responsibilities:

- Register account
- Search tutors
- Book sessions
- Rate tutors
- Make payments

Tutor

Responsibilities:

- Create profile
- Manage availability
- Accept bookings
- Conduct sessions

Administrator

Responsibilities:

- Manage users
- Verify tutors
- Monitor system activity

2.4 User Survey Summary

Survey findings from participants showed:

Requirement	Observation
Reliable tutors	Most users struggled finding trustworthy tutors
Easy tutor search	Average importance rating: High (4–5/5)
Trust factors	Ratings, reviews, recommendations, verification
Scheduling	Flexible scheduling required
Additional features	Teaching videos, recordings, tutorials

3. System Requirements

3.1 Functional Requirements

User Management

FR-01 The system shall allow students to create accounts.

FR-02 The system shall allow tutors to register accounts.

FR-03 The system shall validate login credentials.

Tutor Management

FR-04 The system shall allow tutors to create profiles.

FR-05 The system shall display tutor qualifications.

FR-06 The system shall verify tutor profiles.

Search and Matching

FR-07 The system shall allow students to search tutors by:

- Subject
- Availability
- Tutor type

FR-08 The system shall allow filtering results.

Session Management

FR-09 The system shall allow session booking.

FR-10 The system shall allow cancellation and rescheduling.

Payment Processing

FR-11 The system shall support secure online payments.

Rating and Reviews

FR-12 The system shall allow users to submit ratings.

FR-13 The system shall allow users to submit reviews.

Notifications

FR-14 The system shall send:

- Booking confirmations
- Session reminders
- Payment notifications

Learning Resources

FR-15 The system shall allow access to:

- Session recordings
- Sample teaching videos
- Learning materials

3.2 Non-Functional Requirements

Performance Requirements

NFR-01: System response time shall be below 3 seconds.

NFR-02: Search results shall load within 2 seconds.

Security Requirements

NFR-03: Passwords shall be encrypted.

NFR-04: User information shall be protected.

NFR-05: Payment transactions shall be secure.

Availability Requirements

NFR-06: System uptime shall be 99%.

Usability Requirements

NFR-07: Users shall complete registration within 3 minutes.

NFR-08: The interface shall be simple and user-friendly.

Compatibility Requirements

NFR-09: System shall support Android devices.

NFR-10: System shall support iOS devices.

4. External Interface Requirements

User Interface

The application shall provide:

- Login screen
- Registration screen
- Tutor search screen
- Booking screen
- Payment screen
- Profile screen

Software Interfaces

- Payment Gateway API
- Firebase Authentication
- Database System
- Notification Service API

5. System Constraints

- Internet connectivity required
- Dependence on third-party APIs
- Limited project budget
- Mobile device compatibility constraints

6. Assumptions and Dependencies

- Users possess smartphones
- Internet access is available
- Tutors are willing to register
- External APIs remain available

7. Acceptance Criteria

- Users can create accounts successfully
- Users can search tutors successfully
- Users can complete booking successfully
- Payment transactions complete successfully
- Notifications are delivered correctly
- Users can submit ratings and reviews
